REVISED FLOWSHEETS

Wound Record (WR-145.1)

Previously this form provided the documentation of assessment and treatment for three different wounds: Wound #1 on the front page, Wound #2 and 3 on the reverse side. To accommodate requests for additional room to chart on this form, the areas for Wound #2 and 3 on the reverse side has been removed and replaced with a full page for notes. As a result, end users will document one wound only on each WR-145 form. In addition, the size of the 'Treatment Type' box for each dressing change was also increased and minor changes were made to the legends at the top of the front page.

Daily Systems Assessment 12 hr (DSA-153.3)

Hourly rounding documentation was added for both shifts.
